DECK EVERY WHEEL PARK

Community Design Questionnaire

This is your chance to help shape a permanent concrete park for Denman Island. Please tell us what you want to ride, what you want the park to feel like, and which ideas matter most to you.

Rider feedback will be weighted most strongly in the design process, while community input helps ensure the park works well for everyone.

1. About you

Age (optional)	_____
I am a… (check all that apply)	[ ] Skateboarder [ ] BMX rider [ ] Scooter rider [ ] Rollerblader [ ] Other park user (please specify): _____ [ ] Interested parent or community member [ ] Spectator [ ] Other: _____
Years using a skatepark or pump/flow park	[ ] New to it [ ] 1-2 years [ ] 3-5 years [ ] 6+ years
How often do you ride?	[ ] 4+ times/week [ ] 1-2 times/week [ ] A few times/month [ ] Not often

2. Where and how do you ride?

Local places you currently ride (streets, parks, schools, trails, etc.):

_____

Your favourite skateparks or riding destinations:

_____

What do you most enjoy doing when you ride?

_____

3. The three reference styles

The next three pages show examples sent by Radius Skateparks. Please react to each one before choosing the mix you would like to see on Denman.

A. High Flow Street

Fast, connected street-style riding with banks, hips, step-ups and features that keep riders moving.

How much should this style influence the park?	[ ] A lot [ ] Some [ ] A little [ ] Not at all
What appeals to you?	_____
What would you include or avoid?	_____

Examples of elements: banks, hips, step-ups, bump-to-rails, stair sets, kickers

B. Organic Flow

Rolling terrain built for movement, speed and linking lines together in a natural, playful way.

How much should this style influence the park?	[ ] A lot [ ] Some [ ] A little [ ] Not at all
What appeals to you?	_____
What would you include or avoid?	_____

Examples of elements: rollers, hips, flow lines, gaps, transfers, curved banks

C. Plaza

A street-inspired area focused on technical riding and creative lines around ledges, pads, rails and stairs.

How much should this style influence the park?	[ ] A lot [ ] Some [ ] A little [ ] Not at all
What appeals to you?	_____
What would you include or avoid?	_____

Examples of elements: ledges, manual pads, flat bars, stairs, rails, hubbas

Your overall park priorities

4. What mix of terrain would you like? Please make your total add up to 100%.

High Flow Street	_____ %
Organic Flow	_____ %
Plaza	_____ %
Transition / bowl	_____ %
Total	_____ %

5. Your must-have elements

List your top five features. Examples: bowl, rolling terrain, bank hip, flat bar, manual pad, flat ledge, spine, stairs with rail or hubba, transition hip, etc.

1.	_____
2.	_____
3.	_____
4.	_____
5.	_____

6. Nice-to-have ideas

What three features would be great to include if space and budget allowed?

1.	_____
2.	_____
3.	_____

7. Anything else we should know?

Ideas, concerns, accessibility needs, safety considerations, or anything else you would like the design team to hear:

Thank you for helping shape the DECK Every Wheel Park.
